NWR is a service-disabled veteran-owned prime contractor. We win federal and state work, hold the contract, the risk, and the compliance, and deliver through a vetted network of subcontractors and suppliers assembled per requirement. For contracting officers, NWR opens direct award paths: SDVOSB set-asides and sole-source under FAR 19.14, and California's DVBE preference, where an award to NWR counts fully toward the state's 3% participation mandate. Teams on set-aside work are structured to meet the limitations on subcontracting at 13 CFR 125.6 / FAR 52.219-14.

Differentiators

- **Set-aside standing that counts twice:** federal SDVOSB and California DVBE in one prime, for set-asides, sole-source awards, and state DVBE participation goals.
- **One accountable prime:** a single contract and point of contact; NWR owns schedule, quality, compliance, and reporting end to end.
- **Vetted network, screened before award:** SAM exclusion check, license and insurance verification, references, and signed flow-downs on every partner.
- **Solicitation-speed response:** capability data, quotes, and sources-sought responses returned on solicitation timelines, typically within two business days.
